

Key Features

- **Cage Code: 1XLB8**
- **NSN Number: 7025015368844**
- DUNS: 883411142
- ASI 9100, ISO9001-2000 Compliant
- Only 1.7" high (1U)
- COTS Product Configuration
- Protective Cover
- Keyboard, Monitor and Mouse in a 1U Assembly
- Built in Speakers
- Meets Military Shock & Vibration Tests

Product Overview

Our military products are precision built and quality tested to provide the very best solution to our customers. We strictly adhere to the military standards in the design and production of these units where stability and reliability are key. ACC can supply a server, raid, or KVM for any need, from a small office to a large military installation. ACC products can simplify your operations, provide optimized solutions, and sustain value with extremely reliable solutions. All ACC systems are designed with the best components for the best performance and efficiencies making our systems easy to deploy, manage, and maintain.

Solutions & Applications

Mission critical electronics designed for the demanding field portable, naval, airborne and tracked/tactical wheeled vehicle platforms utilized by US and overseas Defense Departments and Security Organizations.

Our focus towards the military and prime contractors is to provide computer systems that meet MIL-STD specifications for form, fit, and function. Our experience includes systems that we have designed to meet MIL-STD 901D. ACC designs systems for deployment to field, mobile, and tactical environments.

ACC uses the best quality architecture and components to assure that the customer is provided with quality, long lasting value and growth to exceed your expectations for the enterprise.
